

AUGUST 2019

IMPERMAX POLYUREA H FLEX (aluminium finish), not just a nice metallic-looking finish

Impermax Polyurea H Flex holds several certificates as waterproofing membrane, ETA, external fire performance Broof(t2), fire reaction B2 (DIN-4102-1: 1998), hail resistance (EN-13583: 2012) and radon gas diffusion coefficient/radon permeability (radon barrier).

The aluminum color version has the advantage of not needing an aliphatic protective top coat, the metallic aesthetic appearance is maintained over time, which saves a costly step in the application process.

RAYSTON FLOOR PU30 COMFORT, COMFORTABLE FLOORING, SILENT AND HIGHLY DECORATIVE

Often, in our day-to-day lives, we experience noise situations: offices, corridors, sports halls, residences, hospitals, schools.

That is why our RAYSTON FLOOR PU30 COMFORT system contributes to the improvement of noise pollution with the newly classified for impact noise reduction according to UNE - EN ISO 10140-1: 2016 - UNE - EN ISO 10140-3: 2011+ A1: 2015, reaching an absorption of -17dB.

**PROJECT REFERENCE: ROOF
REFURBISHMENT OVER AN OLD
BITUMEN MEMBRANE (ALUMINIUM
FINISH)**

Over an old bitumen membrane (aluminium finish) that was leaking, after cleaning and preparing the surface, Porosity Sealer Flex, Impermax Polyurea H Flex membrane (ETA number 16/0149) and the protective top coat of Colodur (pigmented in grey) were applied. In this way, costs of dismantling, transport and deposition of residues in a controlled landfill were avoided. Useful life of these materials was extended; therefore, the environmental footprint of the project was reduced to a minimum. Apartment building, 1.400 m², port of Castellón (Spain).

FLOORING PROJECT REFERENCE: RENEWAL TRACK MULTIDEPORT

Singular project in sports flooring, application of COLODUR ECO MATE, aliphatic bi-component polyurethane in waterbase finish in matte, VOC free, for the protection of sports areas and high traffic areas, high resistance to wear and UV rays.
