

SEPTEMBER 2019

NEW CERTIFICATE IMPERMAX 2K M, an eco-friendly waterproofing membrane

Impermax 2K M is a performant waterproofing membrane, based on a two-bicomponent polyurethane that has the advantages of being a solvent-free resin (odorless) and with the possibility of being applied in a single layer (2 kg/m²) on horizontal surface, wet-on-wet system.

In addition to a CE quality mark, it presents a new certificate that confirms the percentage of vegetal material of plant origin (renewable) in its composition. The test, based on the Carbon-14 technique, has been performed in a prestigious laboratory in Miami, USA.

SINGULAR WORK OF THE MONTH: WATERPROOFING OF A SUPERMARKET ROOF IN ZARAGOZA

After confirming the high cost in time and money necessary to regularize the roof of this building, it was decided to propose a floating system, not fully adhered to the support. The solution, exclusive of Krypton Chemical consists of the extension and fixation of the special non-woven fabric (NMDC technology) of Geomax Spray 200 and the subsequent application of a continuous Polyurea Rayston membrane. The system guarantees the complete watertightness of the roof with the creation of a continuous elastomeric waterproofing membrane.

**YOUR FREE PASS FOR
Advanced Engineering UK fair on
October 2019**

**ADVANCED
ENGINEERING 2019**

From 30 & 31 October 2019,
KRYPTON CHEMICAL will be present as an
exhibitor at the Advanced Engineering fair,
NEC, Birmingham.
